

PROCEDURE IN USING THIS MANUAL

METHOD OF OPERATION

GENERAL FORMAT — Each car make is listed under a separate tab. On the first page after each tab is a Table of Contents which follows this general format.

1. **GENERAL INFORMATION SECTION** -- Includes relevant information about each model. This consists of starting serial to year cross-over, Model Identification & Picture Identification.
2. **INDEX SECTION** — Each model car has its own index. Find the index for the model needed. In each index the parts are listed under the following headings:
 ENGINE
 ELECTRICAL
 BRAKES & WHEELS
 STEERING & SUSPENSION
 AXLE & DRIVE SHAFT
 COOLING & FUEL
 BODY PARTS
 CLUTCH & TRANSMISSION
 Note that this order follows the same order of groups as the Hollander Auto-Truck Edition.
 Opposite each part listing is our interchange number.
3. **INTERCHANGE SECTION** — Locate the interchange number in the Interchange Section which immediately follows the index. Under that number we list all vehicles using that part.
4. **PRICE** — The suggested list price is located in the interchange section to the right of the interchange number. All prices are rounded to the nearest dollar. Prices not shown are either not available or are subject to factory invoice. Effective date of price is shown on the first page of each interchange. Foreign car parts prices are not stable and often dealers do not sell at factory list price.
5. **ILLUSTRATIONS** — For several makes an illustration section of the more important chassis parts are shown.

HOW TO READ OUR LISTINGS

Part Numbers — When two part numbers are listed together, the first number is the right hand (Passenger side) and the second number is the left hand. Example: 4268766-7. Number 4268766 is right hand and the number 4268767 is the left hand. Right & left hand parts, inner & outer parts do not interchange unless otherwise stated.

2. **Reading of Notes** — Notes giving further interchange are to be interpreted exactly as they read. Example: A note under 120 reads "Our No. 150 fits." Under 150 is a note reading "150 fits our 120." The note under 120 is no problem, but the note under 150 means just what it says and does not mean that 120 fits 150.

3. **Coverage** — All interchange is based on original equipment as installed at the factory unless stated otherwise. Special care must be taken (especially on older models) when making an interchange between replacement and original equipment parts. Many times replacement parts have been installed that are completely different from the original equipment part.

Warning: In earlier years, cars may be titled a different year than produced. Use the serial number crossover to years in the General Information sections to determine year.

4. **Assembly Interchange** — Many parts are covered as complete units or assemblies as the used parts dealer would sell it. Such assemblies as Brake Assembly, Engine Assembly, Carrier Assembly, Axle Assembly, Transmission Assembly, Trans-Axle Assembly are covered as complete units. See the following "WHAT PARTS ASSEMBLIES INCLUDE" for what parts are covered in each assembly.

WHAT PARTS ASSEMBLIES INCLUDE

ENGINE

Engine Assembly — Interchange includes manifolds, carburetors, & oil pan. Interchange does not include flywheel. Horsepower & emission control devices are not considered in the interchange.

ELECTRICAL

Alternator — Interchange is less pulley.

Tail Lamp Assembly — Interchange includes housing & lens. However, interchange does not consider the design of the lens. In some cases it will be necessary to interchange lens in sets.

Prices — Are for new parts, not rebuilt. Rebuilt prices usually 33-40% less than new price stated.

BRAKE & WHEELS

Front & Rear Brake Assembly — Disc brakes include caliper, disc, & backing plate. Drum brakes include drum, & backing plate.
